

PREXAparts is Brechmann Handels GmbH & Co. KG's performance brand for high-quality OEM ident parts. With over 45 years of experience, we only supply selected ident parts of outstanding quality that meet and often exceed the OE parts standard in terms of precision, quality and function. We deliver top quality at competitive prices – fast, reliable and efficient.

Belt Tensioner

Benefits at a glance

Production and process safety as well as quality assurance comply with official OEM standards

PREXAparts products offer the same accuracy and service life as the original parts

Every product is subject to PREXAparts quality assurance checks

PREXAparts products are designed as 1:1 replacements for OE parts and offer the same reliability

Always up-to-date database of all items – available at any time on TecDoc

Our large stock ensures fast and high availability at all times

Facts & Know-How

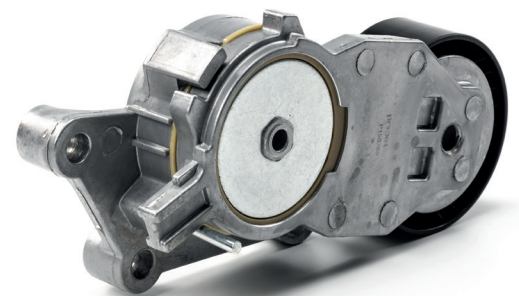

The V-ribbed belt is a technical advancement of the classic V-belt and drives various auxiliary units such as the alternator, air conditioning compressor, water pump, or power steering pump.

The belt tensioner ensures smooth and quiet operation of the V-ribbed belt; the required tension of the belt is kept constant – the belt tensioner permanently compensates for material elongation of the belt and dampens vibrations caused by auxiliary units by maintaining the correct tension.

The belt tensioner automatically achieves the necessary or correct tension mechanically, ensuring optimum power transmission.

The belt tensioner ensures low-friction belt operation, significantly reducing wear on all components.
