

PREXAparts is Brechmann Handels GmbH & Co. KG's performance brand for high-quality OE ident parts. With over 45 years of experience, we only supply selected ident parts of outstanding quality that meet and often exceed the OE parts standard in terms of precision, quality and function. We deliver top quality at competitive prices – fast, reliable and efficient.

Belt Pulley, Crankshaft

Benefits at a glance

Production and process safety as well as quality assurance comply with official OE standards

PREXAparts products offer the same accuracy and service life as the original parts

Every product is subject to PREXAparts quality assurance checks

PREXAparts products are designed as 1:1 replacements for OE parts and offer the same reliability

Always up-to-date database of all items – available at any time on TecDoc

Our large stock ensures fast and high availability at all times

Facts & Know-How

Due to the combustion cycles and ignition sequence of the cylinders, reciprocating piston engines do not have perfect concentricity. The crankshaft is constantly accelerated and decelerated.

An intact pulley, which dampens vibrations and the inherently uneven engine running, is therefore particularly important for the durability of the engine and a pleasant and comfortable ride.

In addition, the belt pulley provides vibration decoupling in the auxiliary unit drive. This ensures quiet belt drive, damping of vibration and oscillation noises, and a longer life expectancy for the driven units.
