

PREXAparts is Brechmann Handels GmbH & Co. KG's performance brand for high-quality OE ident parts. With over 45 years of experience, we only supply selected ident parts of outstanding quality that meet and often exceed the OE parts standard in terms of precision, quality and function. We deliver top quality at competitive prices – fast, reliable and efficient.

## Hydraulic Filter

### Benefits at a glance

Production and process safety as well as quality assurance comply with official OE standards

PREXAparts products offer the same accuracy and service life as the original parts

Every product is subject to PREXAparts quality assurance checks

PREXAparts products are designed as 1:1 replacements for OE parts and offer the same reliability

Always up-to-date database of all items – available at any time on TecDoc

Our large stock ensures fast and high availability at all times

### Facts & Know-How

The hydraulic filter is one of the most important components necessary for the smooth operation of an automatic transmission; especially for protecting the sensitive hydraulic systems that control the transmission and enable gear changes.

The hydraulic fluid (also transmission oil) is pressurised to operate valves and shift gears. This fluid is pumped through various channels in the transmission, with the hydraulic filter cleaning the oil and thus ensuring consistent and reliable transmission performance.

The hydraulic filter protects moving parts of the transmission in particular from contamination and stabilises transmission performance, where clean and filtered hydraulic fluid is essential for precise control of the transmission and gear changes.
